

Python: module genutil.arrayindexing

genutil.arrayindexing

[index](#)

Modules

[MA](#)

[cdms](#)

[genutil](#)

Functions

get(Array, Indices, axis=0)

Arrayrrayindexing returns Array[Indices], indices are taken along

Usage:

C=get (Array, Indices, axis=0) # i.e. C=Array[Indices]
Indices accepts negative value ,e.g: -1 is last element

set(Array, Indices, Values, axis=0)

Arrayrrayindexing set Array[Indices] with Values, indices are taken

Usage:

Array=set (Array, Indices, Values, axis=0) # i.e. Array[Indices]=Values

Indices accepts negative value ,e.g: -1 is last element
